

Gisan Geff Raniego

Web Developer

"Sometimes, elegant `<codes/>` are !readable."

I'm a Laravel web developer with a strong command of Laravel's MVC architecture and Eloquent ORM, my skills include RESTful API development and third-party integrations. As a hobbyist coder, crafting elegant and efficient solutions is not just a job for me; it's a love affair with technology. I believe in writing clean, well-documented code that is easy to read and maintain.

Experience

○ **March - August 2023**

Mediaone Software Solutions | Davao City

Web Developer

I was assigned as a backend web developer on the Imotor project—a marketplace for selling and buying automobiles. I utilized an MVC architecture with a CRUDified controllers approach for code scalability. Also, I was tasked to develop the frontend and backend of the Admin Panel.

○ **2022 - January 2023**

Mediaone Software Solutions | Davao City

Web Developer

As an Intern, I was assigned as a backend web developer to develop API endpoints on the Paw Tracer Project using Laravel framework.

○ **2021 - March 2022**

University of Mindanao | Matina Campus, Davao City

Web Developer

I developed the Academic Action Plans Monitoring Matrix System with data analytics as our capstone project at the University of Mindanao.
